

## Learner Management

Easily manage learners and groups to personalize access to content, cost of resources and learning pathways.

Flexible categories of users, the ability to manage multiple domains in the LMS, and seamless integration with AMS or CRM systems enhances management of courses, notifications and branding for all users.

## Continuing Education

Managing the complexity of multiple credit types and values, rules, and the differing state and national criteria for continuing education credits is where TopClass LMS excels.

Ease and simplify the administration of CEU, CME, CLE, or other CE credits, and track all training history, including external training for members or external learners.

## Content & Testing

TopClass LMS provides full support for SCORM, AICC, and xAPI content standards. Collate and organize content for online courses, webinars, instructor-led training, and blended learning.

Build and manage tests, quizzes, surveys with flexible question pool management, automated roll-up rules and actions in the powerful testing engine.

## Certification

Simplify, automate and improve the management of programs for initial certification, designation, credential maintenance and re-certification.

Empower your learners to take ownership of the process with self-service certificates and complete training history printouts.

## eCommerce

Create a revenue stream for your organization with full shopping cart support for multiple currencies, languages, tax, and payment options for selling content, webinars, conference registrations, and more.

Easily use coupons, tokens and multiple pricing options to manage sales from your public and private catalogs.

## Reporting & Analytics

Transform reporting data into intelligence with over 30 standard reports, many of which are configurable. Get even more from your data with a custom reporting package so you can build your own reports.

Use comprehensive reports to inform planning and budgeting for your training and certification programs.

#### Integration

Standard integration bridges are available for several AMS, including iMIS and Personify360.

Single-sign-on and other software integrations ensure comprehensive system-wide data is available for reporting.

With no customization or third-parties involved, we provide an efficient implementation for a cost effective and timely launch of learning programs.

#### Responsive Mobile

Your learners are on the go, voluntarily accessing learning when they can, where they can outside of working hours.

TopClass LMS provides fully responsive design and mobile support, automatically displaying your branded learning content on any mobile device, anywhere, anytime.

#### Social & Gamification

Facilitate community discussion and collaborative learning with profiles, groups and discussion forums. Extend the conversation to social networks to enable sharing and recommendations of learning resources with peers.

Use digital badges to make training more engaging and motivate learners by rewarding participation and achievements.

### Additional options to enhance your learning solution

#### Hosting

TopClass LMS is securely hosted in a number of ways for our clients. Ask us about SaaS, private cloud or on-premise hosting depending on your needs.

#### Webinar Bridge

If you use GoToTraining or another service, you can set up and run your webinars from within the LMS using the TopClass Webinar Bridge.

#### Custom Reporting

Get more from your data with a custom reporting package or take advanced data model training so that you can build your own reports.

#### Migration Services

Let us transition your existing data into TopClass. Our content and data migration services will save you time and effort.
