

Focus on innovative education with integrated iMIS learning solutions

Engage and Empower Learners

TopClass LMS, the award-winning Learning Management System, delivers engaging, personalized training to your global audience of members, advisors, and volunteers, with the help of engaging social and collaborative tools. Provide an impactful educational experience that gives learners the confidence and knowledge they need to achieve your mutual goals.

Experts in Integrated Learning

Integration is a critical part of any LMS implementation and vital to ensuring a seamless experience for all users by eliminating redundant data entry and manual reporting.

WBT Systems' in-house experts have been integrating systems for more than 20 years. Our TopClass integration bridge allows for easy integration with all versions of iMIS and provides a single point of support for your implementation project from start to finish.

“Having all our member records easily accessible in one place is a huge benefit to our organization. The flexibility and real-time automation of the integration between TopClass LMS and iMIS means we can create reports and manage information exactly the way we need to. We have better insight into the progress members are making and when they complete their programs.”

Elizabeth Green
Director of Information Technology
Sigma Sigma Sigma

"TopClass LMS is a natural fit with iMIS and together they deliver a sophisticated learning environment with the cloud-based simplicity, convenience, and security that associations demand."

Bob Alves, Chairman and CEO
Advanced Solutions International

Seamless Learner Experience with Single Sign On

Single Sign On functionality shares user information and permissions from iMIS to TopClass LMS, removing the need for learners to re-enter their login information, and automatically creating an account in TopClass LMS if none exists. Member profile information, group structures and much more are synchronized from iMIS to TopClass LMS, enabling the personalization of the learner experience.

Accurate, Real-time Training Data

TopClass LMS writes learner data and activities back to iMIS when a course is completed or when credits or certificates are earned. iMIS always has a complete, accurate and up-to-date picture of member training thanks to real-time synchronization from TopClass LMS to iMIS.

Streamline Processes to Save Time

Eliminate rekeying of data which saves time, reduces errors, and provides better quality management. The integration allows maximum automation, which simplifies tracking, notifications, and reporting. In addition, it supports configurable work flows to align with your processes, ensuring the required information is available in the right system at the right time and allowing you to focus on delivering innovative programs to learners.

"Upon installing TopClass, we quickly saw the benefits of proper integration. The TopClass interface with iMIS allowed us to rapidly remove many of the productivity issues we were facing. Our members appreciate having a single login for all our systems, and the look and feel is far more modern than our previous LMS."

Alex Watterson, Project Manager, Australasian Society for Ultrasound in Medicine
